

μPLT

Indicator Controller for pH, ORP, Conductivity, Oxygen, Turbidity, Chlorine, Chlorine Dioxide, Chlorites, Peracetic Acid, Ozone and other oxydising substances, Sulphites, Metabisulphites and other reducing substances

Microprocessor based instruments, fully programmable, for the analysis of many physico-chemical parameters. Instrument configuration is easily performed via display and keyboard and calibration is automatic. Measure and temperature are indicated on a 5 digit red LED display. The instrument includes 2 digital outputs (from relay) that can be configured as NC or NO via software and can be programmed as low alarm, high alarm, alarm with hysteresis or windows alarm. Two digital inputs are available, one for digital hold of the measure, and one for the input of an external alarm (e.g. level switch, temperature switch etc.) Typical use of these instruments is for on line measurements of various physico-chemical parameters.

Advantages

- Direct input from electrochemical sensors and pertinent temperature sensor
- Automatic thermo compensation of the measure via software through specific algorithms
- Display indication of both analysis and temperature values
- 2 digital outputs from relay, programmable
- 2 digital inputs, programmable
- Advanced self-diagnostic features; sensor diagnostic capability
- Suitable for panel mounting and for outdoor installation (IP 65 protection degree)
- Great flexibility, can measure many other parameters besides the one listed above
- Easy to use: menus and functionalities are the same for all the analysers of the family

Operating principle and realization

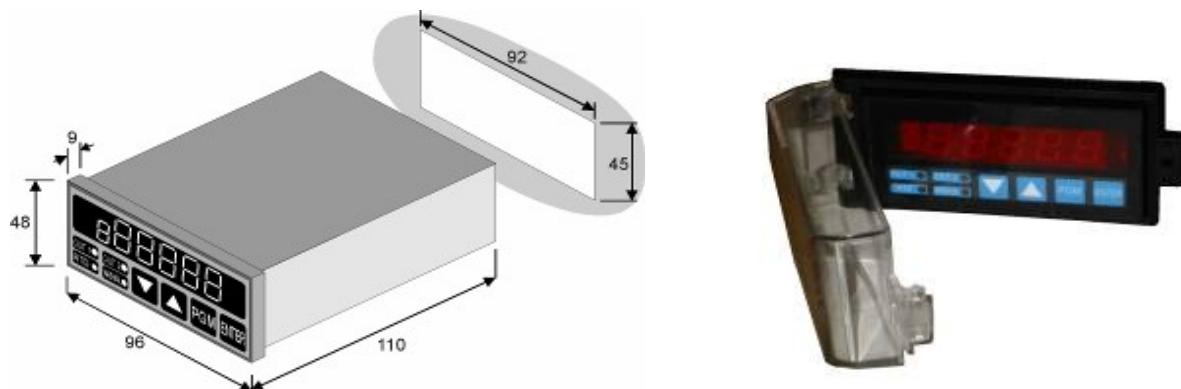

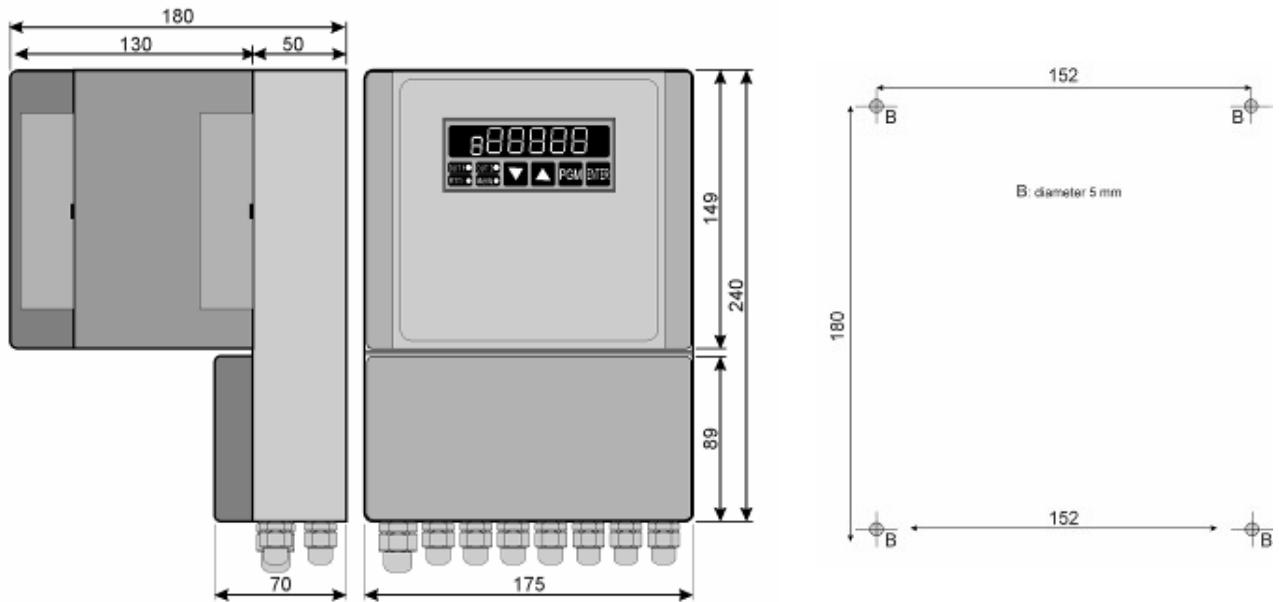

The Series μPLT includes microprocessor based instruments for the analysis of pH, ORP, ISE, Conductivity, Turbidity, Dissolved Oxygen, Oxygen in air, Oxidising Substances (e.g. Chlorine, Chlorine Dioxide, Chlorites, Ozone, Peracetic Acid, Permanganate, Bromine), Reducing Substances (e.g. Metabisulphites, sulphite, sulphur anhydride etc.) It can be directly connected to the sensor of one of the a.m. parameters and to the pertinent temperature sensing element. The measure is compensated for temperature variations and displayed in engineering units. The instrument provides 4 digital outputs that can be configured as NC or NO via software and can be programmed as low alarm, high alarm, alarm with hysteresis or windows alarm. The 2 digital outputs are from relays. Two digital inputs are available, one for digital hold of the measure, and one for the input of an external alarm (e.g. level switch, temperature switch etc.) The instrument is sturdy and compact and is available for outdoor mounting, included in an IP65 housing, for panel mounting included into a plastic case, 48 x 96 mm, IP 54 protection degree and for panel mounting included into a plastic case, 48 x 96 mm, IP 54 protection degree, c/w a transparent front cover.

hysteresis or windows alarm. The 2 digital outputs are from relays. Two digital inputs are available, one for digital hold of the measure, and one for the input of an external alarm (e.g. level switch, temperature switch etc.) The instrument is sturdy and compact and is available for outdoor mounting, included in an IP65 housing, for panel mounting included into a plastic case, 48 x 96 mm, IP 54 protection degree and for panel mounting included into a plastic case, 48 x 96 mm, IP 54 protection degree, c/w a transparent front cover.

Installation, Maintenance and Calibration

The instrument is supplied completely programmed according to customer specifications (if indicated in the order). Install the instrument and complete wirings according to instruction manuals, then power up and verify that the instrument configuration complies with process requirements. Now operate a calibration of the measuring chain.

The instrument does not require specific maintenance, it is only necessary to periodically check the calibration. The frequency of calibration check depends upon the kind of analysis operated and the process in which the instrument is installed.

µPLT

Technical Specifications

Housing Mod.µPLTxTxxxAxxx (panel mtg): Noryl, IP 54 protect., 48 x 96X100 mm. Inst.space: 45 x 92 mm
Housing Mod.µPLTxTxxxBxxx (panel mtg), with transparent front cover:.....
.....Noryl, IP 54 protection, 48 x 96X100 mm. Inst.space: 45 x 92 mm; polycarbonate transparent front cover
Housing Mod.µPLTxTxxxCxx (outdoor installation):.....ABS, IP 65 prot.degree;
.....dimensions 175x2400x180 (wxhxd) mm
Input signal:.....from sensor: pH, ORP, Conductivity, Turbidity, D.O., Cl₂, ClO₂, PAA, KMnO₄, Br₂,
.....S₂O₅²⁻, SO₂, SO₃²⁻, or other and from pertinent temperature sensor, Pt100.
Digital inputs:.....2, from NPN static contact or from voltage free contact,
.....max.voltage 18 V; max. closure current 4 mA;
.....In standard functionality mode: IN1 : Digital hold of reading (freezing);
.....IN2: alarm from external equipment (level switch, pressure switch, temperature switch etc.).
.....If present, the alarm is locally indicated through LED "WASH/AL" flashing
Display:.....red LED, h 12.5 mm, 5 digit and algebraic sign, programmable decimal point, selectable range
Digital outputs:.....2 alarm set points, output from relays, SP, 3A – 250 V, resistive load.
.....The alarms can be configured as low alarm, high alarm, window alarm, alarm with hysteresis.
.....Each set-point has programmable differential.
Measuring range (Where required, specify desired measuring range at order):
pH and pH(Sb):.....-1.00 ÷ +15.00 pH
ORP:.....-2000 ÷+2000 mV
ISE:.....-2000 ÷+2000 mV or 0÷9999 ppm
Conductivity:.....0.0÷20.00 / 0.0÷200.0 / 0.0÷2000.0 µS;
.....0.000÷20.000 / 0.00÷200.00 / 0.0÷2000.0 mS
Turbidity:.....0.0 ÷ 2000.0 NTU
D.O.:.....0.000÷20.000 ppm 0÷100% O₂
O₂ in air:.....0÷100% / O₂ 0÷21% O₂
Chlorine0÷2000 ppb / 0.00÷10.00 ppm
Oxidising Substances0÷2000 ppb / 0.00÷10.00 ppm / 0.0÷2000.0 ppm
Reducing substances0.0÷2000.0 ppb / 0.00÷10.00 ppm / 0.0÷2000.0 ppm
Temperature:.....-50÷+300°C
Other:.....-99999 ÷ + 99999, with selectable decimal point.
Integration (smoothing):.....programmable
Temperature compensation range:.....-9.9°C ÷ 99.9°C 0,1°C resolution; -50 ÷ 300°C 1°C resolution
Power supply:Mod.µPLTxT1xxxxxx : 24 Vac, ±10%, 50/60 Hz, maximum consumption 3.3 VA
.....Mod.µPLTxT4xxxxxx : 24 Vdc, ±10%, maximum consumption 3.3 VA
.....Mod.µPLTxT5xxxxxx : 115/230 Vac, ±10%, 50/60 Hz, maximum consumption 3.3 VA
Data storage:.....E²prom stores data also during power shut off
CE compliance:.....according to pertinent rules (93/68/CEE – electromagnetic compatibility; low voltage)
Electrical classification:.....for safe area installation
Ambient temperature limits during operation:.....0 ÷ 50 °C
Storage temperature limits:.....0 ÷ 60 °C
