LEVEL TRANSMITTERS

NIVOTRACK MAGNETOSTRICTIVE LEVEL TRANSMITTERS

MAIN FEATURES

- 0.1 mm or 1 mm resolution
- Insertion length maximum 15 m
- Rigid or flexible guide tube
- Plastic coated version for chemicals
- 4-20 mA and HART output
- Graphical display
- 99-point linearization table
- Measurement optimisation
- Volume measurement
- Ex version
- OIML R85 certification

APPLICATIONS

- Custody transfer measurement
- Oil and gas industry
- Fuels and gasoline products
- Pharmaceutical industry
- Chemical industry
- Food industry
- Alcohols and beverages
- Installation in bypass tubes feasible
- Supplementary level transmitter for NIVOFLIP magnetic flip indicator

GENERAL DESCRIPTION

NIVOTRACK magnetostriuctive transmitters are an ideal solution for high accuracy measurement of clean fluids. Its high precision renders the NIVOTRACK suitable for custody transfer measurement of liquids such as fuels, solvents, alcohol derivatives etc. Units with flexible tube do not only make this accurate measurement for higher tanks possible, but offer a more convenient way for shipment and installation. Plastic coated versions of the NIVOTRACK substantially expand the field of application by a wide range of aggressive materials.

Integrating the transmitter into a process control system is easy thanks to the intelligent signal processing and communication software as well as the wide range of accessories offered.

OPERATING PRINCIPLE

A float containing a magnetic disc moves along a guide tube with the specific magnetostriuctive wire in it. A pulse generated by the electronics travels along the magnetostriuctive wire. At the point the pulse reaches the float's magnetic field, a torsion develops. Reflected from the torsion point, the pulse creates an acoustic wave that travels back along the wire. The 4-20 mA output of the transmitter is proportional to the elapsed time between the excitation and detection.

POSITION OF THE DISPLAY

Vertical and horizontal display position is offered for optimal mounting in your application.

NIVOTRACK IN SYSTEM WITH PC

The instrument with HART output can be connected to a PC using an **UNICOMM HART USB modem**. Max. 15 normal (non Ex) instruments can be connected to a HART line. Measured values can be visualised and / or the instruments can be programmed via digital HART communication. **EView2** configuration software or **NIVISION** process visualization software.

NIVOTRACK IN A HART MULTIDROP LOOP

MultiCONT can handle a max. of 15 HART capable transmitters (4 Ex-version transmitters). The digital (HART) information is processed, displayed and if needed it can be transmitted via RS485 communication line to a PC. Remote programming of the transmitters is also possible. Visualisation on PC can be accomplished with **NIVISION** process visualisation software.
